

NASIM MOHAMMADI

Computer Science Graduate | Software Engineer | Software Engineering

Mazar-e-Sharif, Afghanistan

Phone: +93 779 480 815

Email: nasimmohammadi567@gmail.com

GitHub: <https://nasim1403.github.io>

Personal Website: <https://nasim1403.github.io>

PROFILE

Computer Science professional with Bachelor's and Master's degrees in Computer Science from **Savitribai Phule Pune University, India**, with a focus on **Software Engineering**.

Experienced in software development, web application development and database management, with practical experience in designing and implementing software systems for industrial, hospitality and e-commerce applications.

Strong technical background in **PHP, Python, JavaScript, HTML/CSS, MySQL and database-driven application development**, combined with experience in system design, problem solving and independent software project development.

Seeking a **PhD position in Computer Science / Software Engineering in Europe**, with research interests in software engineering and the development of intelligent software systems.

RESEARCH INTERESTS

Software Engineering · Software Architecture · Intelligent Software Systems · Artificial Intelligence · Explainable AI · Decision Support Systems

EDUCATION

Master of Computer Science (M.Sc.)

Savitribai Phule Pune University, India

2020–2022

Focus: Software Engineering

Advanced study in Computer Science with an emphasis on software development, software engineering, programming, database systems and system analysis.

Bachelor of Computer Science (B.C.S.)

Savitribai Phule Pune University, India
2013–2017

Academic foundation in Computer Science, programming, database systems, software development, computer systems and information technology.

TEACHING EXPERIENCE

Lecturer in Computer Science

Sadat University, Afghanistan
2023

- Delivered lectures for undergraduate Computer Science students.
 - Supervised students in laboratory sessions and academic activities.
 - Prepared examinations and evaluated student performance.
 - Supported students in understanding programming and Computer Science concepts.
 - Contributed to an academic and collaborative learning environment.
-

SELECTED SOFTWARE PROJECTS

1. Yaqub Muhebi Industrial Company

Corporate Website

Role: Software Developer / Web Designer

Project Area: Corporate Web Application

Designed and developed a professional corporate website for **Yaqub Muhebi Industrial Company** to establish a structured digital presence and present company information, services and activities.

Key Contributions

- Analysed project requirements and planned the website structure.

- Designed the information architecture and navigation.
- Developed responsive web interfaces.
- Created company profile, services and business-information sections.
- Implemented contact functionality.
- Applied principles of usability, responsive design and maintainable development.
- Structured the application for future extension and database integration.

Technologies: HTML5, CSS3, JavaScript, PHP, MySQL

2. Hotel Arsalan International

Hotel Website

Role: Software Developer / Web Designer

Project Area: Hospitality Web Application

Designed and developed a professional website for **Hotel Arsalan International** to present the hotel's rooms, accommodation, facilities and services through a structured digital platform.

Key Contributions

- Designed the website structure and user interface.
- Developed responsive hotel information pages.
- Implemented room listings and accommodation sections.
- Developed booking-request forms.
- Created gallery and contact pages.
- Structured hotel information for clear and user-friendly presentation.
- Designed the system with potential for future database and online-booking integration.

Technologies: HTML5, CSS3, JavaScript, PHP, MySQL

3. Afghan Carpet Online Marketplace

E-Commerce Website for Afghan Carpets

Role: Full-Stack Web Developer

Project Area: E-Commerce / Database-Driven Web Application

Designed and developed an online platform for the **presentation and sale of Afghan carpets**, providing a structured digital catalogue and customer-oriented shopping functionality.

Key Contributions

- Designed the product catalogue and product presentation system.
- Developed product cards and detailed product pages.
- Implemented shopping-cart functionality.
- Developed user registration and login functionality.
- Implemented user dashboard functionality.
- Integrated PHP with MySQL for database-driven operations.
- Designed database structures for products and users.
- Developed responsive interfaces for desktop and mobile devices.
- Applied software engineering principles to improve usability and maintainability.

Technologies: HTML5, CSS3, JavaScript, PHP, MySQL

PROFESSIONAL EXPERIENCE

Software Engineer / Web Developer

Independent / Project-Based Software Development
Afghanistan

- Analyse software and client requirements.
 - Design web application structures and software architecture.
 - Develop front-end and back-end components.
 - Design and manage relational databases.
 - Integrate databases with web applications.
 - Develop responsive and user-oriented interfaces.
 - Implement authentication and user-management functionality.
 - Test, debug and maintain software applications.
 - Deploy and maintain web applications.
 - Develop solutions according to project requirements and user needs.
-

TECHNICAL SKILLS

Programming Languages

- Python
- PHP
- JavaScript
- SQL
- HTML5
- CSS3

Software Engineering

- Requirements Analysis
- System Analysis and Design
- Software Architecture
- Web Application Development
- Full-Stack Development
- Object-Oriented Programming
- Software Testing and Debugging
- Software Maintenance

Database Technologies

- MySQL
- SQLite
- Relational Database Design
- Database Integration
- phpMyAdmin
- SQLiteStudio

Development Tools & Platforms

- Visual Studio Code
- XAMPP
- Git
- GitHub
- Live Server
- Netlify
- Vercel

Other Technical Skills

- Microsoft Office
- Windows
- Linux

CORE COMPETENCIES

- Analytical Thinking
- Problem Solving
- Critical Thinking
- Software Development
- System Design
- Database Management
- Project Development
- Teamwork

- Collaboration
 - Communication
 - Creativity
 - Time Management
 - Team Leadership
 - Cross-Cultural Collaboration
-

ACADEMIC & RESEARCH DIRECTION

My intended doctoral research direction focuses on the intersection of **Software Engineering and Artificial Intelligence**.

I am particularly interested in the design and development of intelligent software systems that are reliable, maintainable and explainable, with potential applications in **AI-based decision-support systems**.

This research direction builds on my academic background in Computer Science and Software Engineering and my practical experience in developing database-driven and web-based software systems.

INTERNATIONAL ACADEMIC EXPERIENCE

India

Completed undergraduate and postgraduate education in Computer Science at **Savitribai Phule Pune University, India**, gaining international academic experience in a multicultural academic environment.

LANGUAGES

Language	Level
Persian (Dari)	Native
English	Professional Working Proficiency
Pashto	Basic
Hindi / Urdu	Conversational

ADDITIONAL INFORMATION

- **Academic Field:** Computer Science
 - **Specialization:** Software Engineering
 - **Target Degree:** PhD
 - **Target Areas:** Computer Science / Software Engineering / Intelligent Software Systems
 - **Preferred Region:** Europe
 - **English-medium academic background**
 - Experience working in multicultural environments and with international clients.
-
